Quiz

Question 1

1/1 point (graded)

In which **two** locations can you use Data Analysis Expression (DAX)?

- ☐ Calculated rows
- ☒ Calculated columns
- ☒ Measures (in Excel 2013, measures are called calculated fields)
- ☐ Summary functions

Submit

You have used 1 of 2 attempts

Question 2

1/1 point (graded)

What are measures in Excel?

- ☐ A standard of measurement across columns.
- ☒ A calculation that you create for the purpose of measuring an outcome or result relative to other factors. ✓
- ☐ A hard-coded value in the Excel data model.

- ☐ A way to dynamically change Excel data sources.

Submit

You have used 1 of 2 attempts

Question 3

1/1 point (graded)

Which statement describes an implicit measure?

- ☐ An implicit measure is one that you create manually.
- ☐ An implicit measure is one that comes from outside the data model
- ☒ An implicit measure is one that Excel generates for you when you add fields to the Values area of a pivot table. ✓
- ☐ An implicit measure is one that you create using MDX formulas.

Submit

You have used 1 of 2 attempts

Question 4

1/1 point (graded)

Which statement describes an explicit measure?

- ☒ An explicit measure is one that you create manually. ✓
- ☐ An explicit measure is one that comes from outside the data model
- ☐ An explicit measure is one that Excel generates for you when you add fields to the Values area of a pivot table.

- ☐ An explicit measure is one that you create using MDX formulas.

Submit

You have used 1 of 2 attempts

Question 5

1/1 point (graded)

What does the RELATED function (DAX) return?

- ☒ A single value that is related to the current row from another table. ✓
- ☐ A single value that is the sum of another column from another table.
- ☐ A calculated value based on the argument that is passed to the function.
- ☐ A calculated value based on the primary key of the table.

Submit

You have used 1 of 2 attempts
